## HUGE HYBRID

## BLUEBERRIES

These big, luscious, marble size U. S. Dept. of Agri. hybrids are so good for eating fresh or delicious in pies, preserves and canned or frozen. The attractive shrub-like plants bear large clusters of mild, sweet fruit, easy to pick. They require no spraying and it is easy to grow blueberries if you make the soil acid and mulch heavy with peat, sawdust, oak leaves or any organic matter. A heavy mulch is better than cultivation. If soil is sweet or alkaline mix thoroughly with aluminum sulphate. We send sufficient aluminum sulphate with each order for planting 1st year.

Plant no less than two varieties for pollination. The plants grow for a lifetime and have handsome glossy foliage that changes red, gold and orange in fall. Beautiful pink-tinted white fragrant blooms on compact bushy plants make blueberries ideal for hedges or landscaping your yard. Hardy throughout U. S. A. You will get more and larger fruit if the old canes are pruned so the plants keep new shoots coming. On good blueberry land a gross sales of \$1,200 per acre selling wholesale is the average income.

**WEYMOUTH**—**7F15**—Improved early ripening hybrid.

**STANLEY**—**7F16**—Excellent mid-season ripening hybrid.

**PEMBERTON**—**7F17**—Recommended, late ripening hybrid.
